vibers™ paper

Page 1/1

Version 02

Issue date : 01-07-2019

Revision date : 31-01-2020

Note

Vibers paper is available in all weights from 80 to 650 grams. On roll (up to 2 m wide) and as plano sheets. All formats and gram weights are possible from 1000 kilograms. There is a paper production run every 7 weeks.

From stock, Vibers paper is available as blank sheets of 46 x 64 cm in 90, 300 & 550 grams and as 120 gram envelopes in sizes C5, C6 & Carré sizes.

What is so special about Vibers?

Vibers is made with elephant grass that grows on Dutch soil. We use fallow land which not fit for food production. Elephant grass is a very special plant. It absorbs 4x as much CO₂ as a forest with trees, grows on marginal soil without pesticides and needs little water. Our production also takes place in the Netherlands. In this way we give the local manufacturing industry a new impulse and we prevent transport from distant countries.

Why paper and cardboard from vibers?

- A pure Dutch product of premium quality
- Proven origin of the Elephant grass
- Proven origin of the FSC pulp from sustainably managed forests
- Our paper is produced in the oldest paper factory from the Netherlands: 400 years of craftsmanship & innovation
- Produced in a FSC certified factory
- No chemical operations such as bleaching
- Elephant grass, unlike many other grasses, contains no protein. Therefore, chemical treatment is not necessary
- Reduced energy and water consumption in the production of our paper
- Food contact statement for "dry food"
- Due to the longer fibers, our paper is strong, very easy to fold and boxes are easy to stack
- Good to process and print
